Product Recall Notification Letter

August 26, 2024

Midwest Industries Customers,

I am reaching out to inform you about an important product recall that affects one of our products which you may have purchased or sold. This is in line with our commitment to safety, transparency, and customer satisfaction.

The affected product details are as follows:

- Product Name: Midwest Industries Beretta 1301 M-LOK Handguard
- Model Number: MI-1301-HG

The reason for this recall is due to an out of spec component in the front collar of the handguard. It has come to our attention during our quality control process that this could result in the firearm malfunctioning during high round counts.

We apologize for any inconvenience and will replace the malfunctioning product at no cost or offer a full refund. For assistance, please contact our customer service at 262-896-6780 or email us at tech@midwestindustriesinc.com.

Thank you for your understanding and cooperation in this matter. We regret this situation and assure you that we are undertaking measured steps to prevent its recurrence.

Tyler Storch
